Cornilleau is developing in the global market place thanks to high quality, innovative products with a distinctive design. Through the development of a brand new generation of wheels, we have succeeded in improving the mobility and manoeuvrability of our tables, without ever making the slightest compromise in terms of safety, stability and sturdiness. All the Cornilleau tables are developed and manufactured in France, within the very hub of the business, in Bonneuil-les-Eaux in the Oise department (Picardy), the Cornilleau family’s native village. The research and development laboratory associated with the marketing unit are here at the heart of the factory: ‘Made in France’ grey matter intended to devise, design and manufacture all the products, for today and tomorrow.
Cornilleau guarantees its tables against any manufacturing defect for a period of 3 years. This guarantee is extended to 10 years for outdoor tables. This 10-year warranty applies to all the various components, with the exception being the wear parts (wheels, net and net posts). All our tables adhere to the European safety standard EN 14468. Nevertheless, in order to ensure the highest level of safety, Cornilleau has positioned itself a long way above this standard.

Cornilleau guarantees its OUTDOOR tables for 10 years and its INDOOR tables for 3 years. To make sure you continue enjoying your table long after your guarantee period, we promise that our spare parts will be available to you for 20 years. Cornilleau is synonymous with built-in durability!

Cornilleau strives to offer the highest quality products. However, some of our products undergo wear and tear over time. That’s why we feel it’s important to provide you with the best possible after-sales service. Our after-sales services goes beyond simply exchanging your product in event of a problem. It also covers managing your delivery, table assembly and providing telephone or computer support for online customers.

You have questions? Please contact our after-sales service
By phone at +33 3 44 80 22 22 from Monday to Friday from 8am to 12pm and from 1:30pm to 5:30pm
Via chat or drop us an email on our dedicated website:
www.cornilleau-services.com

Congratulations, you have just bought a Cornilleau table. Now’s the right time to take advantage of Cornilleau’s services. To activate your guarantee (3 years on Indoor tables and 10 years on outdoor tables), we invite you to create your account and save your table information on the following page:

www.cornilleau.com/en/activate-guarantee/

Once your guarantee is activated, you will find all the information about your table as well as your order details. You will also ensure the availability of spare parts for your table over a 20-year period.
PING DOWN THE STREET

GARDEN PARVIS

From 11 July to 25 August 2019, La Défense main square was the scene of a rather unique event combining a variety of entertainment, concerts and street food. With its open access ping-pong and pool tables, Cornilleau played a key role in bringing the Garden Parvis to life and making the whole thing a social occasion. One of the event highlights saw professional players Stéphanie Loeuilllette and Romain Lorentz come along and play with passers-by for a day, treating them to the thrill of challenging the champions.
PING! ENGLAND

Throughout the summer 2019, the 9th edition of PING! ENGLAND gathered together nearly 500,000 participants, who for 2 months once again had the opportunity to play on over 600 Cornilleau tables spread right across Britain, including around a hundred in the capital itself. Ping is so British!

PING TOUR

The Ping Tour is a truly unique promotional tour, orchestrated by the French Table Tennis Federation and Cornilleau. The 2018 edition, which ran from 8 May to 8 September, encompassed France’s largest cities so as to enable the greatest number of people to experience all the Ping universes. Roll on the 2020 edition!

ULTRADURABLE OUTDOOR TABLES
CROSSOVER  OVERSIZE  DOUBLE  WHEELS

CLEARANCE
The diameter (200mm) of our new Oversize wheels, combined with their ultra-robust design, offers unique clearance (kerbstones, terraces, pavements, etc.).

FLEXIBILITY
The bracket links the two wheels at the very spot where there are the greatest mechanical stresses. As such, our engineers have taken very special care with the design of this part, in order to make the table incredibly easy to manoeuvre in any situation.

MANOEUVRABILITY
The greater the number of wheels the greater the load-bearing capacity. As such, the use of wide, twin wheels (32mm), significantly improves the manoeuvrability of the table, especially on varied (lawn, gravel, wooden terrace, etc.) or uneven terrains.
HIGH QUALITY MATERIALS
ADAPTED TO MEET YOUR NEEDS.

WHAT IF YOU LEAVE YOUR TABLE OUTSIDE ALL YEAR?

Cornilleau has been a pioneer in outdoor tables for the garden. They are designed with anti-corrosion materials ensuring resistance to bad weather.

BOUNCE HEIGHT DEPENDS ON THE THICKNESS OF THE CORNILLEAU PLAYING SURFACE TABLES

</table>

Panels in solid resin laminate, resistant to racket blows. The thicker the panel (5 to 9 mm), the better the bounce.
MATTOP
10 TIMES LESS GLARE FROM THE SUN
AND IMPROVED TRANSMISSION OF SPIN.

SOFTWARE
3 TIMES LESS GLARE FROM THE SUN.
AN EXTRAORDINARY STANDARD OF SAFETY

Using a central release handle, the table can be opened and closed with extreme ease. The DSI system has 16 locking points. The table is fully locked in playing and storage positions. What’s more, because of its unique system, if a child opens the table and releases the handle, the panel automatically locks at 65°, thereby avoiding any risk of accident. Finally, if the top is not fully locked in the playing position, a second locking level stops the top from flipping over.

CENTRALISED SYSTEM INTEGRATED DOUBLE SECURITY

The tabletop can be locked and unlocked thanks to a button system at the bottom and top of the side of your table. Composed of 8 locking points, it meets the safety standard.

EASY TO STORE

The patented Compact Technology system ensures optimum safety, easy movement and minimizes storage space requirements.
THE ADVANTAGES OF OUR LEISURE TABLES

OVERSIZE DOUBLE WHEELS
The diameter (200mm) of our new Oversize twin wheels, combined with their ultra-robust design, offer unique clearance, manoeuvrability and flexibility.

RETRACTABLE TABLE NET
The net swivels automatically between the two panels when you close the table, further optimizing storage space and providing better safety when stored.

EASY TRACK
This handle enables you to easily lift the table over any obstacles (step, edge of the terrace, doorway).

ADJUSTABLE FEET
Wide leg pads enable you to adjust the height of the feet and ensure tabletops are perfectly level where the ground is uneven.

TO MAKE FAMILY LIFE SIMPLER AND SAFER
PERFORMANCE
OUTDOOR
TABLES
Performance is a quest for perfection. It can only be achieved with a subtle combination of features such as playing quality, durability, safety, design and ergonomics. The tables from the Performance range don’t compromise on any level. They benefit from the best technologies and features, to offer a unique playing experience. The exceptional bounce, sleek or stylish or subtle design, ultra-high performance materials, incredible durability, the guarantee for maximum safety, the attention to the smallest detail: without a shadow of a doubt, Cornilleau’s Performance outdoor tables are the industry leaders.

RELIABILITY
WITHOUT THE FUSS

The Sport range tables have been designed to provide the best possible compromise. Light weight yet solid, resistant with optimal safety, they are great value for money making the tables especially appealing. Ultra-durable, shock resistant and weatherproof, like all Cornilleau’s outdoor tables, they provide perfect playing quality for maximum enjoyment of ping-pong with friends or family. And to extend your enjoyment even further, they come with a 10-year warranty.

EYE-CATCHING AND ENJOYABLE TO PLAY ON

A genuine reflection to wood. This exceptional material goes beyond any aesthetic value. The wood frame provides the table with unequalled sound and playing qualities. Contemporary by definition, this table rewrites the codes with its grey indoor top and its retractable net posts. These two ITTF approved innovations are completely new in the world of competition. The 850 Wood, which naturally combines performance with elegance will become a standard for major international competitions as well as perfect match for your interior design.
SOLID WOOD LEGS AND FRAME
- Better channeling of vibrations = unrivalled sound quality

UNIQUE COMFORT OF USE
- Retractable permanent posts (can also stay in position) = you save 30cm in width when folded.
- Angled frame (on players’ sides) = more comfort especially during short play.
The Indoor tables are equipped with a painted chipboard tabletop. The main benefit of this playing surface is the great value for money compared with the rebound quality. That said, this tabletop definitely is not for use outdoors as the material is not designed to cope with bad weather. Rain and, by extension, moisture are its worst enemies (risk of distortion and blistering). The sun’s rays are no exception, as they too very quickly damage the surface layer (risk of discolouration). The other major disadvantage of this so-called indoor tabletop is its fragility in the event of repeated impacting and/or friction (impact from a beginner’s racket for example). You’ve got it, we strongly recommend that you opt for Outdoor tables, even when they are exclusively for indoor use (garage, cellar, etc.). Just as high performance for play, Cornilleau’s Outdoor tabletops have the advantage that they’re weather and shock resistant so they’re ultra-durable. That’s why we guarantee our Outdoor tables for 10 years (ref. page 5) compared with 3 years for the Indoor versions. So don’t wait a second longer, whatever your style of Ping, opt for our Outdoor tables. You won’t regret it!
INSTITUTIONAL OUTDOOR TABLES
OPEN ACCESS TO PING

Specially designed for intensive community use, the tables from the community range solve a seemingly impossible equation: offering excellent playing quality despite the poor treatment very often inherent to public access. Stationary or mobile so as to satisfy the needs of all types of establishments. These tables are popular in campsites, hotels, leisure centres, parks and public gardens.
THE PARK TABLE: ULTRA-STRONG MATERIALS

- Completely weatherproof
- Shock resistant
- Fire resistant
- Graffiti resistant
- Withstands 1600 kg
- Fortified steel net
The Park table is manufactured in France from very hardwearing materials and demonstrates a sturdiness that readily translates to any situation, from impact, to bad weather to vandalism. It offers the best playing quality on the market in this category. Boasting a small footprint, the table can be set up in a park, beside a playground or in a campsite.

PLA Ying Performance
• Height and accuracy of bounce,
• Transmission of spin,
• White lines,
• MAT TOP comfort: 10x less glare from the sun,
• Approved by the French Table Tennis Federation.

3 Ground Fastening Methods Possible:

   Weight (packed): 21 kg

Simplified Set-Up
30 minutes with 2 people
The 510 table is a static Outdoor model. Behind this fluid, full of curves, hides a table that is particularly resistant to ill treatment. Its 100% steel (aluzinc) structure and its high-density, solid laminate tabletop, can really take the knocks, whether they’re from rackets or bad weather. This model has been a tremendous success for nearly 10 years now and is popular in campsites, holiday centres, schools and hotels...

PERFORMANCE AND ELEGANCE

The official supplier to the FFTT (French Table Tennis Federation), Cornilleau has used its know-how to benefit the performance of professional players for over thirty years. Top-level calls for impeccable quality and Cornilleau’s response is a range of 5 ITTF-approved tables, which have proven themselves in the federations’ competitions as well as kitting out the clubs. Given that ping-pong is so visually striking, these competition tables have also been designed to be eye-catching. The attention to detail in this regard imparts a unique elegance.
Cornilleau has developed, designed and produced competition level tables for more than 30 years. All our tables comply with European safety standards EN 14468. To ensure the highest safety levels, Cornilleau product compliance goes much higher than this standard and guarantees the tables against manufacturing defects for 3 years.

Cornilleau is the first manufacturer to develop this system for competition tables. The patented COMPACT TECHNOLOGY system undoubtedly represents the best offer on the market in terms of storage, safety and ease of use.

Thanks to a central unlocking handle, the table can be opened and closed extremely easily. The DSI system has 16 locking points. The table is fully locked in the playing position and folding position. The safest table on the market.

SKILTOP coating, specific to our competition tables, was developed with the best possible attention to detail. It ensures an extremely reliable and regular bounce, as well as optimum adherence to the playing surface for perfect return of play.

“P-BALL READY” SKILTOP
- Spin-sensitive finish specifically designed for plastic balls.
- Non-reflecting, matt, water-based and environment-friendly paint.
- Grey color (available only with 850 Wood ITTF and 740 ITTF): for a better contrast with the ball.
**Wheelchair Play**
The leg assembly has been designed to allow for the locking of a chair under the table for wheelchair play. ITTFW standard.

**Fixed Posts**
ITTF posts fixed permanently to the table will save you time on each installation. The height of the net can be adjusted without affecting tension.

**Robust Materials**
The materials selected for our competition tables are particularly robust (example: sides and feet entirely made of steel).

**Minimum Storage Space**
The leg assembly has been designed to stack tables during storage, providing minimum storage space. Optimal storage size: 1 table = 65 cm + 45 cm for each added table.
A genuine tribute to wood, this noble material which imparts unrivalled resonance and gameplay. With two innovations, its grey tabletop and collapsible net posts, that meet the ITTF requirements, the 850 wood table shakes up the codes. This table will delight competition players as well as all those who love design and a fine game. A desirable object, the 850 Wood table will sublimate contemporary and classic interiors. Blending the universes of design and table tennis, it appeals to those with an eye for the finer things in life as well as players striving for excellence.

Fifteen years after the launch of the first outdoor bat, the Tacteo, Cornilleau has been constantly breaking new ground to offer ever more high-performance products, whether it be about playing performance with the Nexeo and the Nexeo Graphite, or environmental performance with the Softbat, the world's first outdoor eco-design bat, made from recycled materials.
BOOST YOUR GAME

NEXEO

Based on their solid experience of outdoor equipment, Cornilleau’s engineers have developed a patented ‘four-material durable’ version. This outdoor racket stands alone in terms of performance.

NEXEO X90
Latest generation composite racket with carbon

NEXEO X70
Latest generation composite racket

THE NEXEO GRAPHITE X200
A perfect combination of our expertise in outdoor ping and ‘graphite’ technologies that have thus far been reserved for the tennis world, is probably the highest performance outdoor racket on the market. It has taken 3 years for this product to come to fruition and the results offer supreme qualities that one might assume would be incompatible: outdoor (weather resistant), incredibly high performance, ultra-durable (shock resistant) and extra light. Don’t hesitate for even a second, you too can BOOST YOUR GAME!

Made in France

SPEED
Its dynamic sponge ensures fast play.

PRECISION
AND SPIN
Its innovative covering ensures perfect return of spin.

SOLIDITY
AND DURABILITY
Made of strong composite material (carbon for the X90), Nexeo withstands impact and bad weather.

COMFORT
The Nexeo’s elastomer handle, with its ergonomic form, ensures optimal grip.

CARBON FIBER
Carbon fiber inside the blade of the Nexeo X90 increases rigidity for even greater speed.

ULTRA RESISTANT DURABLE

THE WORLD’S 1ST ECO-DESIGN OUTDOOR RACKET

SOFTBAT is made from recovering cotton and recycling polyester fabrics from former ARMOR LUX collections and end of life clothing picked up from a variety of their clients. The SOFTBAT is the first eco-design outdoor racket on the market!
CORNILLEAU was a pioneer in the development of composite (dual-injection) outdoor ping-pong rackets made of composite with the launch of the TACTEO in 2005. Armed with this expertise, we were keen to take things a step further by teaming up with the ECO-CHARGES eco-design programme initiated by our injector partner and the company ARMOR LUX. After several years’ development, CORNILLEAU is launching SOFTBAT, the world’s first eco-design outdoor racket.
Sport. Perform. Excell. Cornilleau offers three ranges of bat for indoor table tennis. From occasional practice to intensive play, all our indoor bats are equipped with an ITTF-approved rubber. Because fun and sensation are a must for all players.

**THE POWER OF CARBON**
AERO - AERO SOFT enables optimum transmission to the handle of shock waves created on impact with the ball. The hand’s sensory system, with its improved touch interface, immediately processes the sensations necessary to provide the perfect response!

DYNACELL: the optimisation of the nature and structure of the material is the key to the elastic properties of a sponge and it takes energy release to a whole new level. This key now has a name: Dynacell.

OPTIFeel Concept: the wooden fibres of each layer of plywood, perpendicularly oriented one with the other, significantly improve stability. OFC provides excellent sensations, which immediately translate as greater control and precision.

EFFICIENT CURVE: made of 90% natural rubber, the efficient curve top-sheet provides an unrivalled grip on coverings this fast.

There are plenty of great reasons to encourage a child to get into table tennis. It's a sociable sport, which can be played with several people and helps to develop psychomotricity, concentration as well as acumen. Umpiring is easy and a tool like BABY PING enables fast-track learning so a child can begin to play and have fun.
BABY PING TO TAKE AN ACTIVE ROLE: A GENTLE APPROACH TO EDUCATION

Specially designed for 4 to 7-year olds, the Baby Ping kit is a training method favouring interaction with others and confidence in one’s abilities. Baby Ping relies on recreational exercises to enable children to develop new skills, whilst stimulating thought and concentration. Taking inspiration from the imagination as children are so fond of doing, the world of the circus, wild animals and stories incorporated in this evolutionary method is in line with the programmes that form part of the national curriculum.

With its round handle and ergonomic shape that helps hand positioning, the Softbat suits little ones and bigger kids. Ideal for schools, associations and leisure centres due to its hardwearing qualities, it also helps to raise awareness about sustainable development. The first outdoor eco-design bat in the world, the Softbat is an educational tool in many ways.

Sold in packs of 10

SPECIALY ADAPTED EQUIPMENT

The kit includes a DVD full of training content as well as ten two-tone ‘Panda’ bats, whose ergonomics are geared around use by children, together with fifteen balls that come in three varieties to support the development of young players. Specially designed, the bats enable youngsters to discover spin thanks to high-quality rubber, as well as how to improve ball control. The balls come in a variety of sizes and materials. Made of foam, they facilitate the first exchanges thanks to a slower speed but a dynamic bounce. The big balls, measuring 55mm in diameter, facilitate the strokes and the spin. Finally, two-tone balls allow the players to visualise the rotation.

Sold in packs of 5
Competition level table tennis requires the very best which drives Cornilleau to constant innovation. This driving force generates high-performance products.

Cornilleau targets the same objective as the athletes who choose the brand: excellence. Using the latest technologies to refine the playing performance of our material. The Cornilleau range designed for competitors ensures that players who are keen to have the best products. Rubbers, Blades, Textiles, accessories: to fit their unique style and game.
The SPIN-DIVE 3D technology is the optimisation of performance settings in the top-sheet’s pimples: shape, size and density. Each TARGET covering features its own unique combination so as to reach a very specific target: grip + power for TARGET PRO GT, grip + precision for TARGET Ultim, grip + speed for TARGET Force, and grip + sound for TARGET Sound.

The IN-TENS sponge is an adaptation of our IN-TENS² sponge. It provides incredible control combined with powerful acceleration. It’s as if it absorbs the energy in the passive game and releases it into the active game. Unique sensations guaranteed! The IN-TENS² sponge is at the pinnacle of the market’s references in terms of the transmission of energy. It fully satisfies the expectations of even the most demanding players by providing enhanced contact with the ball, precision and comfort. It also guarantees maximum enjoyment thanks to the sound emitted with each stroke.

The optimisation of the density and geometry of the pimples is one of the keys to performance with the covering. - The FAST combination guarantees rapidity and power. - The SOUND combination guarantees sensation and decibels. - The PULSE combination guarantees explosive acceleration and decibels. - The SPIN combination guarantees control and rotation.

The special formulation and cell structure enable the NEXTENS sponge to respond to the requirements of ball control with ball pressure. The GT (GREAT TENSION) evolution in our NEXTENS sponge provides additional strength as well as transmitting greater spin onto the ball. The GRIP EXTEND and GRIP EXTEND PLUS top-sheets enable you to transmit even greater spin in every phase of the game through their increased elasticity and impressive level of grip.

The special formulation and cell structure enable the NEXTENS sponge to respond to the requirements of ball control with ball pressure. The GT (GREAT TENSION) evolution in our NEXTENS sponge provides additional strength as well as transmitting greater spin onto the ball. The GRIP EXTEND and GRIP EXTEND PLUS top-sheets enable you to transmit even greater spin in every phase of the game through their increased elasticity and impressive level of grip.
TARGET PRO GT is a range of rubbers ‘made in Germany’ and the result of a research and development programme involving Cornilleau experts, Michelin engineers and the world’s largest manufacturer of rubbers. The top priority for this project: reaching the highest level of performance and safety in topspin and counter-topsin strokes.
Plastic balls have now replaced celluloid balls. Michelin experts have managed to develop a rubber formulation that is entirely compatible with this new type of ball.

So if you are looking for initial strokes laden with spin, optimum precision in counter top-spin, sharp kills, ever more power when rallying loop to loop, as well as enhanced safety when taking the counter initiative... then, you have no time to lose: opt for the P-BALL READY technology!
Target Pro GT-X51 is a powerful, sharp and highly accurate rubber intended for extremely demanding competitors.

Target Pro GT-M43 is a fast, comfortable and outstandingly tolerant rubber that achieves formidable efficiency.

Softer than X51, Target Pro GT-H47 impresses with efficiency and reliability.

Target Pro GT-S39 is a soft, dynamic and very sonorous rubber that results in an incredibly playful rubber.
Pilot Fast is one of the most highly responsive rubbers on the market. With its 40° IN-TENS² sponge associated with its grippiest and most dynamic top-sheet (GRIP EXTEND and FAST technologies), Pilot Fast is a genuine concentration of energy and speed.

Pilot Pulse offers a unique tone and explosive acceleration in topspin. Featuring IN-TENS sponge angled at 37.5° in combination with its higher friction elastic topsheet (GRIP EXTEND and PULSE technologies), Pilot Pulse is pumped full of energy with the perfect blend of speed, resonance and an ultra-precise feel in relation to the ball.

Pilot Sound Power is one of the most sonorous rubbers on the market. With its 35° IN-TENS² sponge associated with its grippiest and most optimised top-sheet (GRIP EXTEND and SOUND technologies), Pilot Sound Power is a genuine concentration of energy and sensation.
Drive Speed is a traditional covering ‘Made in Japan’ for offensive play. Its qualities: clean and immediate transmission of energy, substantial and lasting grip, fairly firm 45° sponge for greater precision. A classic for your offensive game.

Drive Spin is a traditional all-round covering ‘Made in Japan’. Its qualities: very substantial, lasting grip, moderate transmission of energy for greater versatility, fairly soft 40° sponge for heightened sensation. A classic for your allround game.

Start Up’ EVO is even more effective at adding spin to the ball, whilst remaining very tolerant during counter-initiatives and return of serve. Start Up’ EVO is the perfect rubber for making your debut in competition.
Hinoki, which is present on the external ply and is combined with other carefully selected woods, offers a perfect balance between dynamism, ball handling and precision. The Hinoki thus allows our Hinotec blade range to provide new sensations for each game style, and ensures a pleasurable game, as well as an extremely high quality finish. Another notable aspect: unlike 100% Hinoki blades, which provide extremely high tones, the sound issued on each impact by Hinotec blades range will also delight you.

THE RIGHT BALANCE

HINOTEC

The Hinotec blades are particularly appreciated by the players that make up Team Cornilleau.

THE NOBLEST OF WOODS FOR EACH PLAYING STYLE!
Favoring top spin smashes, counter loops and active blocks, you seek the maximum power in each of your strokes. Very precise and perfectly controllable when taking the counter-initiative, Hinotec OFF+ Carbon blade is a redoubtable weapon at mid-distance, and its stroke will convince the most demanding player!

Hinotec OFF - blade suits to any game style. Surprisingly dynamic for a blade of this category, it can also satisfy more experienced players, as long as they choose fast coverings, as well as the most polyvalent players seeking responsiveness in his attacks.

A model of tolerance, Hinotec ALL+ blade is reassuring. Whether you are a polyvalent player, or just a beginner, this is for you! Don’t get the wrong idea, this blade isn’t slow. It provides startling sensations of control and ease of play, without ever letting you down when you need to speed up or strike the killing blow.
The TALISMAN OFF wood (formerly known as QUEST OFF) boasts both personality and muscle. Designed for a polished offensive game combining fast play close to the table and variations in mid-distance rotations, this wood also has a very docile side in the different phases of closely controlled play. The harder Ovankole outer plies provide much needed additional pressure during put-away shots.

85 g
5 plywood
Flared

The TALISMAN ALL+ wood (formerly QUEST ALL+) is the type of model favoured by players seeking control, where the focus is on incorporating variations in rhythm and rotations to obtain balls, which make for easy points. Used in association with the ALL/OFF coverings, this wood is the perfect ally for players trying to hone their game. Teamed up with OFF+ coverings, it will provide you with both precision and control in the counter-initiative phases, whilst never sacrificing your put-away shots.

Flared
ULTRA LIGHT BLADES (70-75 G)
EXTREME SENSATIONS

The concept allows optimal transmission to the handle of shock waves generated on impact with the ball. The hand’s sensorial system immediately processes the sensations necessary for perfect response.

AERO OFF+
SOFT CARBON
Probably the lightest “Carbon” blade on the market! Its two “High Tech” layers (special blend of carbon and epoxy-resin fibres) will provide the owners of this resolutely offensive blade with unprecedented sensations of power and precision. A perfect choice for those who want to muscle up their game or just discover the joys of carbon!

AERO OFF
Sensations and speed are greater than ever with the AERO OFF blade. Topspinners will love the incredible feeling of safety and ease of play it offers. AERO technology will also allow you to immediately enjoy perfect control and great comfort.

AERO OFF-
With the big growth in “new generation” rubbers, often very fast, it is up to offensive players to choose the right blade to limit their counterattack and service-return fouls. This AERO OFF- blade features an extraordinary compromise between speed and security. Topspin enthusiasts will especially appreciate its flexibility as well as its haunting sound delivery.

AERO ALL+
Rarely has a blade suited so many different playing styles. The AERO ALL+ blade is unique in offering instantaneous comfort and security while effectively making all offensive strokes. Unrivalled multi-use!

AERO ALL
A real “featherweights”, the AERO ALL blade is a sure winner for all players looking for maximum control and sensations. Whether you are a good all-around player or more defensive, you will be convinced after just a few rallies. Enjoy a new range of playing pleasures thanks to AERO technology.

MAKING YOUR LIFE EASIER

AFTER SALES SERVICE & SPARE PARTS
Our customers benefit from high quality products and an excellent after sales service. Spare parts can be ordered directly from www.cornilleau-services.com for tables manufactured within a minimum of the last 10 years. Cornilleau after sales service: located at our headquarters in Bonneuil-les-Eaux (France), this department comprises specialists who can answer your questions and offer advice via a simple phone call to:

+33 (0)3 44 80 22 22 from Monday to Friday from 08:00 am to 12:00 noon and 13:30 to 17:30 pm (French time).

SAFETY
All our tables comply with the European safety standards EN 14468. However, in order to ensure the utmost level of safety, Cornilleau has positioned its products well above this standard.

GUARANTEE
Cornilleau guarantees its tables against any manufacturing defect for a period of 3 years. This guarantee is extended to 10 years for outdoor tables. This 10-year warranty applies to all the various components, with the exception being the wear parts (wheels, net and net posts).

DIMENSIONS
- Cardboard packaging: height 141cm, length 157cm, width 10 to 20cm.
- Closed table: height 155cm, length 167cm (leisure and institutional range) and 183cm on all other models, width 75cm.
- Playing dimensions: height 76cm, length 274cm, width 152.5cm.
FIND OUR ASSEMBLY VIDEOS ON

www.youtube.com/videoscornilleau

ASSEMBLY
Cornilleau tables are easy to assemble using clear and detailed diagrams. Many parts are pre-assembled in our factory. User guides and labels on each playing surface describe the main safety guidelines and instructions for use. Average assembly time: 1 hour and 30 minutes.

</tbody>
</table>
**DEF**

**Definition:** Traditional defense, far from the table, generally involving chops (with both forehand and backhand).

**Material:** Very often a long pimple-out rubber (with or without sponge) on backhand, combined with an inverted rubber on forehand. The player can turn his bat.

**Advice:** ALL to OFF- inverted rubber, with a sponge hardness \( \leq 40 \)°. Thickness of the sponge (for inverted rubber): less than or equal to 1.8mm. DEF to ALL+ blade.

---

**DEF**

**Definition:** Modern defense, namely a DEF game with frequent counter-attacks generally incorporating smash or topspin shots.

**Material:** Long pimple-out rubber (with sponge) on backhand, combined with an inverted rubber on forehand. The player often turns his bat.

**Advice:** ALL+ to OFF+ inverted rubber, with a sponge hardness \( \leq 42.5 \)°. Thickness of the sponge (for inverted rubber): from 1.6 to 1.8mm (or even 2.0mm, according to the level of the player). ALL to OFF- blade.

---

**ALL-**

**Definition:** Passive game based on small pushes and blocks alternating with mid-distance defensive shots. Offensive shots are very rare.

**Material:** Pimple-out rubber (short, mid-long or long) or “antispin” on backhand, combined with an inverted rubber on forehand. The player barely turns his bat.

**Advice:** ALL to OFF inverted rubber, with a sponge hardness \( \leq 40 \)°. Thickness of the sponge (for inverted rubber): from 1.6 to 1.8mm. ALL to ALL+ blade.

---

**ALL**

**Definition:** Varied game, more geared around a mid-distance from the table and favoring ball control, placement and variations in spin. The aim is to cause your opponent to commit an error.

**Material:** Two inverted rubbers.

**Advice:** ALL+ to OFF rubber with a sponge hardness \( \leq 40 \)°. Thickness of the sponge from 1.8 to 2.0mm. ALL to OFF- blade.

---

**OFF-**

**Definition:** Defensive play with variations in rhythm and spin, most often slightly mid-distance from the table. Basically topspin is widely used here, principally with late contact on the ball and some fairly high, curved trajectories.

**Material:** Two inverted rubbers.

**Advice:** OFF/ OFF+ rubbers, with a sponge hardness \( \leq 42.5 \)° on both sides. Thickness of the sponge from 1.8 to 2.0mm. ALL+ to OFF+ blade.

---

**OFF**

**Definition:** Complete offensive play, combining fast strokes close to the table and variations in rotation at mid-distance from the table. The topspins are varied and often powerful, accentuated blocks and the player especially mobile.

**Material:** Two inverted rubbers.

**Advice:** OFF+ rubber with a sponge hardness > 40° on forehand and \( \leq 42.5 \)° on backhand. Thickness of the sponge from 2.0mm to max. OFF- to OFF+ blade.

---

**OFF+**

**Definition:** Very offensive style where taking the initiative is the absolute priority. The player moves about close to the table, returning the ball very early using topspin smashes, loops or active blocks. The player may also move away to a mid-distance from the table with wide-ranging and powerful topspins.

**Material:** Two inverted rubbers. Possible use of short pimple-out rubber on one of the two sides (common in Asia). The ball is then spun back on the bounce.

**Advice:** OFF+ rubbers with a sponge hardness > 40° on both sides. Thickness of the sponge from 2.0mm to max. OFF to OFF+ blade.
